

NATIONAL ASSOCIATION OF  
ELECTRICAL DISTRIBUTORS

June 10, 2013

The Honorable Todd Young  
United States House of Representatives  
Longworth House Office Building, Room 1007  
15 Independence Avenue, SE  
Washington, DC 20515

Dear Representative Young:

We write in support of H.R. 10, the Regulations from the Executive In Need of Scrutiny (REINS) Act of 2013, and thank you for introducing the Act this year.

The wholesalers that we represent at the National Association of Electrical Distributors are committed to helping the local economy and providing American jobs. The expansion of new and costly rules dramatically impacts their businesses and job creation as a whole. The REINS Act will increase accountability in the regulatory process and improve congressional oversight. We support this regulatory reform because it would give elected officials the right to vote on new regulations – so they may fully represent their constituents.

We are pleased to stand in support of the REINS Act.

Sincerely,

The National Association of Electrical Distributors
